

November 6, 2023

The Honorable Frank Lucas, Chairman  
The Honorable Zoe Lofgren, Ranking Member  
Committee on Science, Space, and Technology  
U.S. House of Representatives  
Washington, DC 20515

Dear Chairman Lucas and Ranking Member Lofgren,

I am writing on behalf of EarthCast Technologies, which strongly endorses H.R. 6093, the Weather Act Reauthorization Act of 2023. This bipartisan legislation will build on the successes of the Weather Act of 2017 and improve our nation's weather forecasting capabilities through innovation and collaboration with the private sector.

EarthCast Technologies specializes in environmental intelligence services including modelling, high-performance computing, big data, artificial intelligence, machine learning, and advanced system architecture. Our operational expertise has allowed us to develop advanced environmental systems for both research and development and operational mission critical systems. We are confident that the improvements to the Weather Act found in this legislation will allow us to better partner with agencies like NOAA to provide cutting-edge science and technology solutions that aid government mission requirements.

EarthCast Technologies applauds both the persistent support by the Committee and reauthorization of the Weather Act. We look forward to further Congressional action on this legislation and lend our full support to its enactment.

Sincerely,

A handwritten signature in black ink that reads "Greg Wilson".

Greg Wilson  
President and CEO,  
EarthCast Technologies, LP
