

## **H.R. 8462, the National Quantum Initiative Reauthorization Act**

**Allison Schwartz**, Senior Vice President of Global Government Relations and Public Affairs, D-Wave:

*“We’re encouraged by the movement of NQI reauthorization by the House Science Committee. The committee strikes the right balance between advancing quantum computing hardware and expanding government programs that include near-term applications to support innovative quantum-powered solutions. We look forward to working with Congress as this bill moves through the legislative process.”*
