

H.R. 8462, the National Quantum Initiative Reauthorization Act

Dr. Rajeeb Hazra, President & CEO, Quantinuum:

“Quantinuum supports bipartisan reauthorization of the National Quantum Initiative Act, and we applaud the House sponsors for moving forward with this important legislation. As global competitors accelerate their own investments, reauthorizing the NQIA now is essential to safeguarding national security, strengthening the domestic quantum supply chain, and sustaining U.S. quantum leadership.”
