

H.R. 8462, the National Quantum Initiative Reauthorization Act

Institute of Electrical and Electronics Engineers (IEEE-USA)

“IEEE-USA supports the National Quantum Initiative Reauthorization Act (H.R. 8462) because it recognizes that the next phase of the quantum race will be won by those who can engineer reliable, scalable systems. By prioritizing the development of a multidisciplinary ‘quantum-ready’ engineering workforce and strengthening our domestic supply chains, this bill ensures that the United States not only innovates but also leads the global transition to a quantum-enabled economy.”
