

November 6, 2023

The Honorable Frank Lucas, Chairman
The Honorable Zoe Lofgren, Ranking Member
Committee on Science, Space, and Technology
U.S. House of Representatives
Washington, DC 20515

Dear Chairman Lucas and Ranking Member Lofgren,

I am writing to express GreenSight's endorsement of H.R. 6093, the Weather Act Reauthorization Act of 2023. This bipartisan legislation will continue to advance our nation's weather forecasting capabilities through ingenuity and collaboration. While it reaffirms vital initiatives set in motion by the Weather Act of 2017, this bill also paves the way for the National Oceanic and Atmospheric Administration (NOAA) to foster novel collaborations through new programs aimed at expanding commercial weather data opportunities. The United States boasts a vibrant commercial sector, and this legislation will empower private industry to contribute to NOAA's mission of protecting lives and property through accurate weather prediction.

GreenSight is a proud member of the American weather enterprise. We serve government and commercial customers with critical data via our innovative drone technologies that can improve both operational efficiency and environmental model accuracy. This legislation will allow us to better partner with agencies like NOAA to collaboratively explore innovative solutions.

GreenSight commends the Committee and its diligent staff for their continued support of the American weather enterprise. We look forward to further legislative steps taken to advance this bill and endorse its passage.

Sincerely,

A handwritten signature in blue ink, appearing to read 'James Peverill', with a long, sweeping horizontal stroke extending to the right.

James Peverill
CEO, GreenSight Inc.
