House of Representatives

COMMITTEE ON SCIENCE, SPACE, AND TECHNOLOGY

2321 RAYBURN HOUSE OFFICE BUILDING

WASHINGTON, DC 20515-6301

(202) 225-6371
<http://science.house.gov>

December 9, 2025

Chris Wright
Secretary
U.S. Department of Energy
1000 Independence Ave. S.W.
Washington, D.C. 20585

Dear Secretary Wright:

The House Committee on Science, Space, and Technology has recently received disturbing reports regarding potential obstructionism within agencies' Offices of Civil Rights (OCRs). As stewards of taxpayer resources and overseers of agency operations, we are alarmed that OCRs' leadership may be delaying investigations and failing to uphold their statutory responsibilities, thereby undermining the fundamental statutory purpose of these offices. The Committee aims to determine the scope of this obstructionism and develop appropriate oversight measures.

While differing slightly in structure across agencies, OCRs play a critical role in ensuring that agencies and their funding recipients comply with federal civil rights law. Such laws include Title VI of the Civil Rights Act, Title IX of the Education Amendments of 1972, and, more recently, Executive Order 14151 ("Ending Radical and Wasteful Government DEI Programs And Preferencing") and Executive Order 14173 ("Ending Illegal Discrimination and Restoring Merit-Based Opportunity").¹ Any pattern of internal resistance to civil rights enforcement, suppression of whistleblower complaints, or obstruction of legitimate inquiries, whether internal or external, warrants immediate scrutiny.

We are particularly troubled by allegations that certain OCR leaders have actively discouraged career staff from pursuing investigations into civil rights violations involving federal grant programs. The Committee's preliminary review suggests that this leadership may be falsely

¹ See, e.g., 42 U.S.C. § 7101 et seq. (establishing the Department of Energy and granting it authority to enforce civil rights law).

claiming that they lack the authority to conduct statutorily mandated oversight. We have also received reports of retaliation against OCR employees who raise concerns about this obstruction. Equally concerning is the apparent absence of meaningful accountability mechanisms within OCR's leadership structure.

These reports suggest a potentially troubling pattern that could compromise the integrity of civil rights enforcement across federal agencies. To properly assess the extent of these issues and understand how your agency is addressing or preventing such problems, we ask that you respond to the following questions.

1. What substantive civil rights enforcement activities has OCR completed since January 20, 2025?
 - a. Please provide specific enforcement activities related to grants complying with Justice40.
 - b. If few or none, what factors are preventing OCR from initiating or completing statutorily mandated investigations?
2. Has OCR conducted reviews of programs enacted under the previous administration for compliance with the Civil Rights Act?
3. Has OCR conducted reviews of programs enacted under the previous administration for compliance with Executive Order 14151 ("Ending Radical and Wasteful Government DEI Programs And Preferencing")?
4. Has OCR conducted reviews of programs enacted under the previous administration for compliance with Executive Order 14173 ("Ending Illegal Discrimination and Restoring Merit-Based Opportunity")?
5. Has any OCR staff member faced adverse personnel actions after raising concerns about the need to conduct relevant investigations?
6. Does your OCR require special approval from agency leadership to initiate or conduct statutorily mandated investigations or compliance reviews?
7. What oversight and accountability mechanisms are currently in place to ensure OCR leadership fulfills its statutory obligations?

- a. How are these mechanisms monitored for effectiveness?
8. Are you aware of any complaints, formal or informal, regarding OCR leadership's handling of civil rights enforcement responsibilities since January 20, 2025?

Please respond to these questions, in numbered order, no later than December 19, 2025. We appreciate your attention to this important matter and look forward to working collaboratively to ensure the integrity, transparency, and functionality of your agency's OCR. If you have any questions, please contact the Committee's majority staff at (202) 225-6371.

Sincerely,
