H.R. 9497, AI Advancement and Reliability Act

"Scale AI is proud to support the AI Advancement and Reliability Act introduced by Representatives Obernolte, Lieu, Lucas and Lofgren. This bill is a critical step towards ensuring that the United States develops the necessary safety standards and frameworks for responsible AI deployment while leading the world in AI innovation. AI has the potential to be the greatest technological advancement of our time and this legislation will help guide its development in a way that maximizes its benefits."
