

H.R. 9211, the LIFT AI Act

“We are proud to support the LIFT AI Act. Artificial intelligence is impacting every part of our society and has great potential to improve education - if we harness it properly and responsibly. The National Science Foundation is ideally suited to provide educators and students with a better understanding of how best to employ AI to make our future even brighter and this bill is a good first step in that direction.”

- James Brown, Executive Director, STEM Education Coalition
