The Honorable Brian Babin Chairman
The Honorable Zoe Lofgren, Ranking Member
Committee on Science, Space, and Technology
U.S. House of Representatives
Washington, DC 20515

Shawn Vasell
Vice President
Corporate Affairs

Shawn.Vasell@hpe.com

Dear Chairman Babin and Ranking Member Lofgren,

Hewlett Packard Enterprise (HPE) strongly endorses H.R. 5089, the Weather Research and Forecasting Innovation Reauthorization Act of 2025. Your dedicated Committee members and staff have worked diligently with stakeholders to build upon the successes of the Weather Act through this new legislation, and HPE wholeheartedly extends its support. We are sincerely grateful for your dedication to addressing critical national issues, such as weather forecasting improvement and technology innovation, and for your support of federal agencies, enabling them to forge stronger partnerships with the private sector.

HPE works closely with NOAA to provide critical support through our expertise in supercomputing and artificial intelligence. We are proud to work with our federal partners to enable advanced computing and data services capability for numerical weather prediction. We are also working diligently on innovations in artificial intelligence and computer sciences to assist with the accuracy and timeliness of future prediction capabilities.

HPE commends the Committee for its continued support of the Weather Act alongside the reauthorization and new programs introduced in H.R. 5089. We eagerly anticipate further progress on this legislation and endorse its passage.

Sincerely,

A handwritten signature in black ink, appearing to read 'S Vasell'.
