Dear Chairman Lucas and Ranking Member Lofgren,

Exail strongly supports H.R. 6093, the Weather Act Reauthorization Act. This bipartisan bill will improve our nation's weather forecasting capabilities and environmental observations through innovation, collaboration, and partnership. America is home to a robust and capable commercial sector that can provide substantial support to NOAA's critical government missions. This legislation will allow private industry to support NOAA in new ways, through commercial data programs, stronger relationships, and collaborative planning for the future.
