Supporters of specific provisions within H.R. 1806

Texas A&M University:

“Given that Congress faces tight spending limits, we are pleased to see that the bill increases funding for the National Science Foundation (NSF) by over \$200 million from current spending levels. Importantly for universities like Texas A&M who partner with NSF for cutting edge research, we are equally pleased to see that the bulk of the increase goes to the Research and Related Activities account. In addition to NSF, Texas A&M is also pleased to see that the bill reauthorizes important programs at the National Institute for Standards and Technology (NIST) and the Department of Energy (DOE).”

Princeton University endorsing Section 506, Fusion Energy.

**SOUTHERN RESEARCH
INSTITUTE**

Nonprofit R&D Coalition, including SRI International, Southwest Research Institute, Southern Research Institute, and Desert Research Institute, endorsing Section 724, Funding Competitiveness for Institutions of Higher Education and Other Nonprofit Institutions.

United States Nuclear Infrastructure Council endorsing Subtitle C, Nuclear Energy Research and Development.

Iowa State University applauding the reauthorization of biofuels programs at the Department of Energy.

The STEM Education Coalition is pleased with the focus on STEM Education in COMPETES.

Gas Turbine Association endorsing Section 663, High Efficiency Gas Turbines Research and Development.

Critical Messaging Association supporting Section 307 for study on technology for emergency notifications on university campuses.
